

Protect your employees
from fatigue and slips and falls

GripTop Anti-Fatigue Mats™ are safe, durable floor mats with a heavy-duty non-slip surface. GripTop is perfectly suited for work stations in manufacturing, service and other areas at industrial facilities.

GripTop's unique grid-rib design traps spilled fluids and foreign matter safely underneath the surface of the mat, reducing the possibility of slips and falls and preventing fluids and grit from being tracked through the facility.

The flexibility of GripTop® mats offer shock absorbing comfort, while the open-weave grid-rib design allows constant air circulation, protecting feet from contact with hard, cold and damp floors.

GripTop mats are available in a range of standard or custom sizes with distinctive colored ramps, including OSHA accepted yellow.

Ideal for use in manufacturing, warehousing, shipping and automotive service areas.
